Contents

Preface
Contributors

1: Merging of endourology and oncology: Endourooncology
   A.D. Smith and A. El-Hakim

2: Development of robotic surgery as a minimally invasive computer aided surgery
   T. Dohi

3: Robotic surgery
   3-1: Technique of da Vinci robot-assisted laparoscopic surgery
       M. Menon and A. Hemal
   3-2: Robotic surgery in the Zeus system
       S. Naito

4: Telesurgery
   4-1: Remote monitoring and assistance during laparoscopy
       L.R. Kavoussi
   4-2: Remote percutaneous renal access using a new automated telesurgical robotic system
       D. Stoianovici

5: Novel therapy for renal cell carcinoma
   5-1: Radiofrequency for percutaneous treatment of RCC
       S. Kanazawa
   5-2: Cryo-ablation of RCC
       K. Nakagawa
   5-3: Non-invasive thermo-ablation of kidney tumors
       K.U. Koehrmann
6: Novel therapy for prostatic cancer
   6-1: Brachytherapy for carcinoma of the prostate
       M. Zelefsky
   6-2: HIFU for the treatment of localized prostatic cancer
       T. Uchida
   6-3: Cryo-ablation for the treatment of prostatic cancer
       B.J. Donnelly

7: New application of energy sources in urology
   Y. Nasu
